The Lauren Corporation

The Lauren Corporation...

is an international contractor specializing in Full-Scope Turn Key services, including Engineering, Construction, Project Management, and Fabrication services. Backed by over 26 years of experience, Lauren serves the following industries: alternative energy, power, materials handling, special metals, pulp & paper, chemicals, polymers and refining. *We are committed to excellence for our customers and our employees on every project, everyday.*

OUR MISSION

Lauren helps our customers succeed by providing innovative solutions and by designing and building the highest quality facilities with timeliness, integrity and skill.

COMPANY FACTS

- ◇ Founded in 1984
- ◇ President and CEO: C. Cleve Whitener III
- ◇ Several North American Offices, throughout the United States and Canada.
- ◇ Completed projects range from \$5,000 shutdowns to \$500 M EPC power plants.

OUR VISION

Lauren's vision is to be a light to the world and the contractor of choice through constructive and caring relationships with customers, suppliers and peers.

WHY LAUREN?

- ◇ 26 years of proven experience
- ◇ Unparalleled safety record
- ◇ 50% of our work is from repeat clients
- ◇ In-house engineering, procurement, construction, and fabrication services
- ◇ #1 EPC contractor for CSP solar and PET solid stating facilities in North America
- ◇ Involved in the design and construction of over 5000 MW of both coal, gas and solar power plants
- ◇ Experienced contractor in the relocation of process plants
- ◇ Multi-discipline, tenured industrial services specialists with experience in all regions throughout the US and Canada
- ◇ Database of over 20,000 pre-screened, qualified craftsmen
- ◇ Licensed in 39 states

MARKETS/SERVICES

POWER

Lauren provides complete Turnkey solutions to the electric utility market. Services include Planning, Design, Procurement, and Construction for the production and delivery of power in the following areas:

- ◇ Simple and combined cycle combustion turbine generation
- ◇ Renewable (Concentrated Solar Power)
- ◇ Combined Heat & Power (CHP)
- ◇ Cogeneration
- ◇ Coal/Lignite fired generation
- ◇ Environmental products & technical solutions
- ◇ Studies, assessments and analyses
- ◇ Plant betterment
- ◇ Plant maintenance
- ◇ Construction monitoring
- ◇ Substations
- ◇ Distribution system
- ◇ System studies

POLYMERS/CHEMICALS

Lauren's strong knowledge of the process technologies in commodity and specialty chemicals and polymers makes us uniquely qualified to provide engineering, procurement and construction services in these highly competitive markets.

Over the last decade, Lauren Engineers & Constructors has been a major supplier of engineering and construction services for the manufacturers of Terephthalic Acid and Polyethylene, with built facilities ranging from grass root plants to modifications and expansions.

REFINING

Lauren offers full scope EPC services to the refining industry for the construction of new facilities and revamps of existing facilities.

These services include:

Overall project management from economic studies through unit startup.

Process design and equipment specification, including:

- ◇ Crude Distillation
- ◇ Naphtha Catalytic Reforming
- ◇ Fluid Catalytic Cracking
- ◇ Vacuum Distillation
- ◇ Hydro-desulfurization
- ◇ Alkylation (Sulfuric and HF)
- ◇ Thermal Visbreaking - Product Treating
- ◇ Cryogenic Recovery of Light Hydrocarbons

FABRICATION/MODULARIZATION

Lauren Engineers & Constructors works under in-house quality and safety programs and maintains these code certifications: A, PP, U, R, and S. We have a 35,000 sq. ft. enclosed shop, certified craft workers and years of experience ready to work for you.

Lauren Manufacturing, a division of Lauren Engineers & Constructors, Inc., is a full service custom fabricator specializing in:

Assemblies

- ◇ Skid Assemblies
- ◇ Platforms
- ◇ Pipe Spools
- ◇ Pipe Supports
- ◇ Plate Assemblies
- ◇ Boiler Components
- ◇ Control Panels
- ◇ Pressure Vessels/Heat Exchangers
- ◇ Tanks

Services

- ◇ Automatic Welding
- ◇ Stress Relieving
- ◇ Grit Blasting
- ◇ Polishing
- ◇ Painting
- ◇ Grooving
- ◇ Machining of Special End Preps
- ◇ Computerized Material Control
- ◇ Computerized Scheduling and
- ◇ Tracking

COMPANY HISTORY

Founded in 1984, Lauren has grown from a small, specialty construction company to become an international contractor, offering Engineering, Procurement and Construction services. Integrity, quality, safety and performance have been committed core values from the very beginning and have helped Lauren to achieve success. Over the last 26 years, Lauren has positioned itself as the leading contractor in the Concentrated Solar Power and Polymers industries, and has completed key projects for the power, refining, pulp & paper, and polymers/chemicals industries.

Working safely has been a fundamental commitment of Lauren from the very beginning, which has allowed Lauren to consistently produce safety results below the industry average. Over the last two years Lauren has reached unprecedented milestones in safety and has helped to set the industry standard for safe work. As evidence of this, Lauren has completed over 6,000,000 workhours without a lost-time injury.

Recently, Lauren has continued to grow through acquisitions, partnerships and strategic alliances. In addition, Lauren has performed an increasing amount of work for international clients, adding to our experience and capabilities. Lauren has offices strategically located throughout the US and Canada to meet your project needs.
