Lauren Engineers & Constructors, Inc. is an experienced outage specialist throughout the United States and Canada. Over the past 20 years Lauren has executed outages for many industrial EPC contractors, including full-scope construction, mechanical and electrical, projects with completion critical schedules, and product delivery demands.

Lauren's services include inspection and maintenance outage work scopes for the paper and pulp industries, power generation facilities and equipment, and the petrochemical industries.

Lauren Industrial Services is uniquely positioned as an entity of Lauren Fabricators, allowing for quick action in response to discoveries of unique problem areas during outages. Whether the need is fabrication and materials supply or an immediately available short term crew augmentation, Lauren is equipped and ready to respond to our customer's needs.

Beyond our customer-focused work ethic, Lauren maintains a clear picture of employer safety and health criteria. Our safety practices and procedures support an individual commitment to safety on the part of all project personnel, resulting in associates who leave the workplace healthy, uninjured, and productive at the end of every day.

We would welcome the opportunity to meet you as a potential client partner or to talk about your outage support needs.

For more information, please send us an e-mail:
